THURSDAY
DAILY DESCRIPTIONS

SANTA FE ISLAND

GALAPAGOS
HABITAT | 1 |
(Departure)

(2 hours navigation
aprox.)

SANTA FE | 2 |

SOUTH PLAZA | 3 |

Created by lava that was uplifted from the sea bed, South Plaza has resident wildlife and diverse plant life.

Santa Fe Island, also called Barrington Island after British Admiral Samuel Barrington, is formed by uplifted, submarine basaltic lava, created some 4 million years' ago. A big part of this is a faulted plateau covered with a forest of giant *Opuntia cactae*.

What to see ?

The most spectacular plants are the giant prickly pear cactae, unique to Santa Fe (*Opuntia echios barringtonensis*). Galapagos dove, Galapagos hawk, Sea Lion nursery, land iguanas, marine iguanas. Birds such as blue-footed, nazca boobies, swallow-tailed gulls and tropical birds.

FRIDAY

DAILY DESCRIPTIONS

**NORTH SEYMOUR
ISLAND**

**GALAPAGOS
HABITAT | 1 |**
(Departure)

(2 hours navigation
aprox.)

**NORTH SEYMOUR
ISLAND | 2 |**

North Seymour Island is great for hiking. There is a circular path about 2 miles long that crosses the interior of the island which allows you to explore the rocky coastal path. On this trail, you will be able to discover some of the largest seabird colonies in the Galapagos Islands.

**BACHAS
BEACH | 3 |**

At this beach, you can choose to rest and/or swim in the wonderful Galapagos waters.

What to see ?

Blue-footed boobies, bright and colorful frigatebirds, sea turtles, Galapagos sharks, sea lions.

What to do?

Trekking, snorkeling, swimming.
