THURSDAY
DAILY DESCRIPTIONS

SANTA FE ISLAND

GALAPAGOS
HABITAT | 1 |
(Departure)

(2 hours navigation
aprox.)

SOUTH PLAZA | 3 |

Created by lava that was uplifted from the sea bed, South Plaza has resident wildlife and diverse plant life.

SANTA FE | 2 |

Santa Fe Island, also called Barrington Island after British Admiral Samuel Barrington, is formed by uplifted, submarine basaltic lava, created some 4 million years' ago. A big part of this is a faulted plateau covered with a forest of giant *Opuntia cactae*.

What to see ?

The most spectacular plants are the giant prickly pear cactae, unique to Santa Fe (*Opuntia echios barringtonensis*). Galapagos dove, Galapagos hawk, Sea Lion nursery, land iguanas, marine iguanas. Birds such as blue-footed, nazca boobies, swallow-tailed gulls and tropical birds.

What to do?

Trekking

FRIDAY

DAILY DESCRIPTIONS

**NORTH SEYMOUR
ISLAND**

GALAPAGOS
HABITAT | **1** |
(Departure)

(2 hours navigation
aprox.)

NORTH SEYMOUR
ISLAND | **2** |

North Seymour Island is great for hiking. There is a circular path about 2 miles long that crosses the interior of the island which allows you to explore the rocky coastal path. On this trail, you will be able to discover some of the largest seabird colonies in the Galapagos Islands.

BACHAS
BEACH | **3** |

At this beach, you can choose to rest and/or swim in the wonderful Galapagos waters.

What to see ?

Blue-footed boobies, bright and colorful frigatebirds, sea turtles, Galapagos sharks, sea lions.

What to do?

Trekking, snorkeling, swimming.

SATURDAY
DAILY DESCRIPTIONS

BARTHOLOMEW ISLAND

GALAPAGOS
HABITAT | **1** |
(Departure)

(2 hours aprox.)

BARTHOLOMEW
ISLAND | **2** |

SULLIVAN BAY | **3** |

Here you can see some amazing
lava formations, it is the product
of a volcanic eruption in 1903.

Bartholomew is an island surroun-
ded by turquoise waters and
beautiful beaches. The island is a
now extinct volcano with a variety
of red, orange, green, black and
shiny volcanic formations.

What to see ?

Pinnacle Rock. Galapagos penguins, sea turtles, green sea turtles, sharks, white-tip reef sharks, tropical fish, sea lions and many other unique marine species.

What to do?

Trekking, snorkeling,
swimming and leisure.

SUNDAY
DAILY DESCRIPTIONS

**SANTA CRUZ
ISLAND**

GALAPAGOS
HABITAT | **1** |

(2 hours aprox.)

(Departure)

DRAGON HILL | **3** |

One of the few visitor sites directly related to a conservation program led by the Charles Darwin Foundation and the Galapagos National Park. It was named after the land iguanas, considered the Galápagos' "dragons".

CHINESE HAT | **2** |

This is a very small volcano close to Santiago Island, surrounded by small spatter cones. It's one of the smallest Galapagos Islands but don't be fooled: it has a unique visitor site with an unforgettable view!

What to see ?

Sea lions, wading birds, tropical fish, sea stars, penguins, land iguanas, flamingos and other shore birds.

What to do?

Trekking, snorkeling, swimming and leisure.
